## Pinseekers Club Championship Points

1. Total points available will be based on the number of players in a tournament, using 20 points per player.
2. Points will be awarded by multiplying the total points available times a factor based on the number of players.
3. 1st place will receive an extra 5 points, 2 nd-extra 4 points, 3 rd- 3 points, 2 nd- 2 points, 5 th- 1 point.
4. Points will be earned in January-November tournaments.

For example, if there are 40 players there will be $40 * 20=800$ points available. The factor will be determined by taking inverse of a players order of finish; 1st place with 40 players would be 40 ; 2nd place would be $39 \ldots$ and last place would be 1 and dividing it by the sum of all player positions, $(40+39+38+37+\ldots+3+2+1)=820$. The factor for 1 st would be $40 / 820$. So 1 st place would get $(40 / 820) * 800+5$ points or 44.02 points, 2 nd place would get $(39 / 820) * 800+4$ points or 42.05 points and last would get $(1 / 820) * 800$ or 0.98 points.

Ties: If there is a tie for 1 st , 2 nd , 3 rd , 4 th or 5 th the average of the extra points will be giving equally, e.g. if 2 persons tie for 1 st, each would receive $(5+4) / 2$ or 4.5 extra points. 2 nd- 5 th would receive 3,2 and 1 point(s) respectively. The factor for ties will be determined by using the average of the inverse of their finish positions, e.g. with 40 players if there is 3 way tie for 7 th then the factor would be $(34+33+32) / 3 / 820$.

The examples listed below all use an even number of players. In the case that the number of players does not match any of these examples, all of the formulas and totals will be adjusted accordingly.

| 40 players |  |  |  | 36 players |  |  |  | 32 players |  |  |  | 28 players |  |  |  | 24 players |  |  |
